Errata for Foundations and Applications of Statistics

Randall Pruim*

Calvin College

Grand Rapids, MI

August, 2013

If you find an error not listed here, please send an email to `rpruim@calvin.edu` with subject line "FAST Errata".

location	issue
28, ¶-1	missing comma in "will be assigned large numbers $\boxed{,}$ and events ..."
29, ¶-1	"even a simply" should be "even a simple"
50, Lem 2.3.2	Part (2) of the "Furthermore" has an unnecessary "$\in [0,1]$ for all $x \in R$"
66, Def. 2.5.2	"Then $t(X)$ is" should be "Then $Y = t(X)$ is"
67, 2nd table	"value of X" should be "value of X^2"
109, Prob 2.84	Final punctuation should be '.' not '?'.
155, caption	"jn" should be "An"
211, Lem 4.6.8	"If" should be "Let"
239	"fit the model" should be "fit a model"
252, Ex 5.1.1	Second "$\pi = 1/3$" should be "$\pi = 1/5$"
271, formula -2	$(x - \overline{x})^2$ should be $(x_i - \overline{x})^2$
286, Thm 5.4.1	$\mathrm{P}(\chi^2 \geq X^2)$ should be $\mathrm{P}(\chi^2 \leq X^2)$
288, R code	`df` is off by one (should be, for example, `5-1`
287, Ex 5.4.9	"fits" should be "fit"
315, Prob 5.2	0.078 should be 0.78 (but the problem can be done either way)
317, Prob 5.16	The data appear in Problem 5.15 (not 5.14)
331, line -1	"for any other vector" should be "for any other vector in the model space"
336	It would be clearer to write $\alpha_0 \mathbf{1} + \beta_1(\boldsymbol{x} - \overline{\boldsymbol{x}}) + \boldsymbol{\varepsilon}$ instead of $\alpha_0 + \beta_1(\boldsymbol{x} - \overline{\boldsymbol{x}}) + \boldsymbol{\varepsilon}$
338	`v0` should be `v1` in defintion of `u1`.

location	issue
348	In Figure 6.5, the residual vector should be denoted $\boldsymbol{E}$ rather than $\boldsymbol{\varepsilon}$.
349, formula 1	The denominator of the rightmost side should be blue, not red.
383	-0.0444 should be -0.444 in the confidence intervals for β_1 and e^{β_1}
388, Table 6.2	Some hats are missing on β_1 in the estimator column.
396, prob 6.36	`power.test.test` should be `power.t.test`
398, Prob 6.42	SSE should be SSM in both displayed equations.
438	$\boldsymbol{Y}$ should be $\boldsymbol{y}$ in the bottom half of the page.
446	`tukeyHSD()` should be `TukeyHSD()`
457	Formula for C_2 is a duplicate of formula for C_1. It should be $C_2 = \frac{\mu_{11}+\mu_{21}}{2} - \frac{\mu_{12}+\mu_{22}}{2}$. Also, the first term for C_3 shoudl be μ_{11}, not μ_{22}.
566, Ex C.2.1	$2\langle 1,1\rangle + 3\langle 2,3\rangle$ should be $-4\langle 1,1\rangle + 3\langle 2,3\rangle$.
580, item 2	unnecessary paren at end of item
595, Sol 5.36	n should be atop the product symbol rather than behind it. Furthermore, the wrong prior has been used.
601, Prob D.7	should be $0.3 \cdot \mathsf{Norm}(8,2) \boxed{:} 0.7 \cdot \mathsf{Norm}(16,3)$
610	confidence interval should also reference page 202
